

## **UK Waste legislation and compliance**

From January 1st 2015, new UK waste regulations required businesses to separate recyclable material (paper, plastic & glass) from other waste. This amendment to the EU Waste Framework Directive is to ensure improvement to the quality and quantity of recycling across the UK.

It means that businesses should ensure that all dry mixed recyclables (paper, plastic & glass) produced by your business are collected separately from other waste such as food and general waste.
