

General Waste Management

The purpose of the Waste Management Plan is to describe the principles, procedures and management of the waste generated by your company

This course enables delegates to develop a Plan to ensure wastes are reduced, reused and recycled wherever possible.

It raises awareness of how individuals can contribute to sustainable and efficient practices to maximise effective routines that save money and protect the environment

Waste Management Plan outlines measures to manage and mitigate waste generation and resource consumption during the operation of the development. The Plan includes details on the following:
